SEAWANHAKA-CORINTHIAN YACHTING. A meeting of the Seawanhaka-Corinthian Yacht

Club was held Tuesday at No. 19 East Twenty-second-st., Commodore H. C. Rouse presiding. The chief business was the report of a special committee on racing measurements for the coming season. The measurements recommended for adoption by the committee are as follows: The length plus the square root of the sail area, plus twice the beam, plus draught, minus 6.66 of the equare root of the midship section, the whole divided by 2. No action was taken on the recommendation.

It was decided to open the clubhouse at Oyster Bay on May 28, and to hold races on that day and on the 30th.

People who visit bloycle tracks often wonder that to few accidents happen. There has been so little opportunity for the riders to get into condition this year that as soon as the sun shines and the tracks are in condition for fast work a big throng of racing men get on the tracks and they whirl around in bewildering style. Only an expert could keep his balance in such a pushing, joiting, flying crew. accident occurred at Ambrose Park on Tuesday afternoon. W. H. Others, again, are inclined to think that seater. Others, again, are inclined to think that more speed can be obtained from the quad or sextet. This claim is based on the fact that four, five or six men working in unison applying their concerted power are able to move faster than any smaller number, as the wind resistance is not increased in proportion and a larger gear can be used without difficulty. But the larger machines are unwielly on most tracks and take some time to get under healway. Besides, they cannot be regulated in speed with the same case as the tandem or triplet, and, being more complicated in construction, are always liable to go wrong at the critical time. Whether the much vaninted superiority of the triplet is based on fact or theory will be practically demonstrated at the National Circuit meet of the Quili Club Wheelmen, on May 21, at Manhatun Boach. There will be a five-mile professional multicycle scratch race run at this meet, and as most of the professionals will line up on the various types of machines in which they place their faith, it will be an excellent opportunity to judge of their relative merits.

COMMISSIONER RYAN PRESIDENT.

REORGANIZATION OF THE AQUEDUCT COMMISSION

-NO SUCCESSOR TO MR, MURRAY AS YET. The partially reorganized Aqueduct Commission had a meeting yesterday and changed the regular day for meetings to Tuesday. As no Commissioner ray, there was not a quorum of the Comm member, was sent for to complete one. The Com mission then elected John J. Ryan, the recently ap-

member, was sent for to compete one. The Commission then elected John J. Ryan, the recently appointed Commissioner, president, and made Commissioner Ten Eyek chairman of the Committee on
Finance and Audit.
Mayor Van Wyck removed Commissioners Dooling and Murray on account of their visit to Albany,
it was learned vesterday that he called both men
to his office and read a sharp lecture to them on
the subjects of home rule and strict attention to
the peculiar business of their own department.
Commissioner Mooling listened respectfully and retired, giving evidence of a contrite spirit, but
Commissioner Murray answered the Mayor when
his turn came. Within twenty-four hours the
Mayor removed both men. He had previously
made arrangements to placate Commissioner Dooling with a new place and at the same time to advance the Deputy Commissioner of Public Buildings, Mr. Ryan, to a place of the grade that had
been promised him last fall. The Mayor made no
such arrangement for Mr. Murray, however, and
it has not yet been decided who chail take his
place.

NEW SCHOOL REGULATIONS APPROVED.

PUNDS FOR HIGH SCHOOL ANNEXES APPRO-PRIATED BY THE SCHOOL BOARD.

An adjourned meeting of the School Board for Manhattan and The Bronx was held yesterday at which the deferred question of rules and regula-tions was again discussed. Many of the new rules were approved and will be adopted hereafter. A committee of five was appointed to investigate the statement that some of the janitors of public schools were receiving more money for their services than the principals.

One of the rules provides for a certain number of

cubic feet of air and square feet of surface for each scholar, and restricts each class to sixty; but the latter provision is not to be applied in exceptional cases where there is the prescribed amount of air and square feet for each scholar.

The Board of Associate Superintendents recommended the licensing of teachers, with an increase of pay. The School Board interfected a supplementary classification to be known as Teachers' License No. 2, which provides for an examination without increase in pay. Superintendent Jasper submitted to the Board schedules of salaries for regular teachers and principals, and this was submitted to a committee. cubic feet of air and square feet of surface for each

teachers and principals, and this was significed to a committee.

The sum of \$22,000 is to be spent in establishing High School annexes for boys and girls. One is to be at Nos, 59 to 67 West Tenth-st, and to have a capacity for twenty-six classes; another at No. 735 East One-hundred-and-forty-seventh-st., and to have a capacity for seventeen classes. These buildings have not been recommended by the Committee on Sites and Buildings, but are supposed to be the best obtainable.

gives the names of the members of the State Commission, and calls for co-operation from the merchants of New-York.

This circular has a supplemental statement concerning the State Fair, which will be held at Syracuse during the last three days of August and the first three days of September. This year the committee having that fair in charge has made a liberal proposition to New-York merchants and manufacturers for exhibits. This committee asked the Merchants' Association to take that matter up and push it, and the latter is now engaged in that work also.

In this work two of its representatives have gone to Byracuse to attend at that city a meeting of the Building Committee of the State Fair Commission to-day. These representatives are clothed with power to arrange all details for exhibitors, and to report back to the directors of the Merchants' Association the result of their work at Syracuse. REFEREE'S REPORT ON THE OLYMPIA.

Jusice Bischoff, in the Supreme Court, yester-day confirmed the report of Samuel Blumenstiel, day confirmed the report of Samuel Biumenstiel, the referee appointed to compute the value of Oscar Hammerstein's Olympis in an action in fore-closure brought against Mr. Hammerstein by the New-York Life Insurance Company, Justice Bischoff also appointed Mr. Blumenstiel as referee in the sale, which will probably take place at the Real Estate Exchange within two weeks. The referee finds that the original amount of the loan made by the New-York Life Insurance Company to Mr. Hammerstein was \$88,859 is. The amount now due from Mr. Hammerstein, including interest, taxes and costs, he places at \$33,068 if. Mr. Hammerstein estimates the value of the Olympia at \$1,250,000.

MR. ORR REPLIES TO MR. GOULD. It was learned yesterday that Alexander E. Orr has already replied to George J. Gould's communi-cation upon the subject of the franchises for the extension of the elevated railroad system. Mr. Orr., when seen in the afternoon, refused to make public the contents of the letter, but it will probably be given out after the meeting of the Commissioners this afternoon. It is understood that the letter does not attempt to answer categorically the state-ments made by Mr. Gould in the effort to justify the position he has taken, but merely requests him to submit some specific proposition to the Beard.

BRITISH STEAMER WRECKED IN CHINA. San Francisco, May 11.-The British tramp for general distribution.

The association is also preparing a circular in the interests of New-York City at the Transcontinental and International Exposition, to be held at Omaha during the months of June, July, August. September and October, which is being sent to all the merchants in Greater New-York. This circular sets forth the situation so far as the exposition is concerned, tersely states what has been done by the Legislature in appropriating \$1.500, and the Merchants' Association in supplementing that appropriation with a liberal contribution. It
